

FOR IMMEDIATE RELEASE

ATLANTIC TOWERS INTRODUCES NEW SUPER TRAMPOLINE T-TOP

November 1, 2007 – Bayville, New Jersey, USA – As a followup to their popular Trampoline T-Top for center console boats, Atlantic Towers is pleased to introduce the new **Super Trampoline T-Top** for larger boats 24' and up.

The **Atlantic Towers Super Trampoline T-Top**, introduced this year at MAATS, IBEX and METS marine equipment shows, features a large sunshade that is a generous 66" wide by 90" long with full port and starboard side handrails and double "torsion bar" stiffeners. The legs incorporate one piece welded grab rails with cross bracing and easily adjust to any width console. Four offset bases allowing a snug fit to the console and a pair of Delrin standoffs complete the installation on most boats. For boats with head compartments, wide based legs are available to allow installation around console side doors. There are no extra brackets or fittings to buy and radar mount and box mounts come standard. Everything needed for a standard installation is included along with a weather resistant acrylic fabric top in your choice of 4 colors. An optional welded 6 Rocket Launcher is also available.

This innovative new unit is specifically designed for owner installation. No more waiting in line for a specialist to schedule the installation! The Super Trampoline T-Top comes with full instructions and all backing plates and hardware required for a thru bolt installation - and best of all, the Super Trampoline T-Top is shipped to you complete with all parts necessary to self-install... a "Tower in a Box"! Atlantic Tower's "Tower in a Box" program allows you to get it fast, get perfect fit, get high quality.

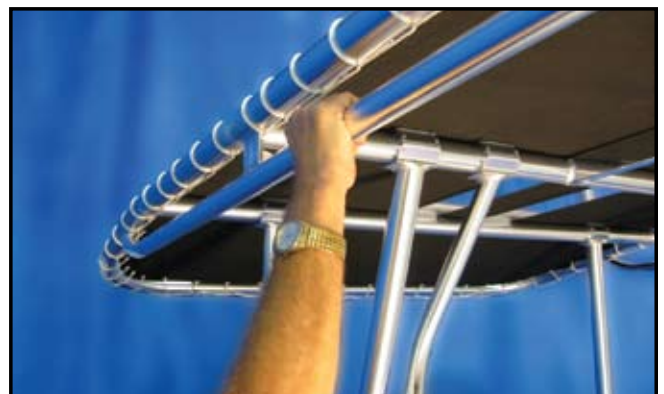

Atlantic Towers, founded in 1981, is one of the marine industry's most respected names in fabricated aluminum products. Structures from Atlantic Towers bring utility, weather/sun protection, added value and striking good looks to thousands of boats from 17 to 110 feet. Products includes T-Tops, Fishing Arches, Hardtops, Half Towers, Radar Arches, Aft Deck Covers, Outriggers, Rod Holders, and Rocket Launchers. Every aluminum structure has been designed by an Atlantic Towers' engineer to be strong and durable as well as pleasing to the eye.
